

MAILCOM 2012 Returns to Washington, DC – April 15-18 at Marriott Wardman Park

After completing one of its best conventions in years at the Washington Hilton, MAILCOM has announced it will return to the nation's capital in 2012 for the 32nd annual conference and exhibition.

Quality Control in Mail Center Operations

In today’s competitive environment, “good enough” is no longer “good enough”. Privacy regulations and customers’ expectations require mailers to produce defect-free documents, in the right envelope, and with the correct address. This workshop will explain why quality control is important for every mail operation, and how to integrate quality control with your existing processes. Learn the differences between TQM, Six Sigma, ISO 9000, and other quality control methods, and how they can be used in your print and mail operations.
